

KLEIN

TEMPO

THE HARMONIOUS CONVERGENCE
OF YESTERDAY AND TODAY,
DESIGNED FOR TOMORROW.

Innovation with meaning

"We didn't want to just create another accessory for our systems. KLEIN's philosophy has always gone much further. If you want to stand out, you have to take care of every detail in the entire application."

Miquel Tárrega Lloret,

Head of the Product Research dept. in 1969.

And thus, **TEMPO** was born:
the first handle by **KLEIN**

It has been 50 years since our design team determined that a sliding door system goes beyond a simple track. Functionality, design, and accessories must come together to offer a perfect, unique solution.

Our colleagues in R+D+i have resumed a project from 1969, with all of the mastery and experience that KLEIN possesses today.

An atypical, revealing immersion in the past, carried out in order to give our systems a different, unique touch, to innovate while looking towards a better future.

As a result, KLEIN is launching a line of accessories for the first time ever. The perfect touch to enhance the minimalism of our systems.

AND THUS, TEMPO WAS BORN

An elegant handle made of solid matte aluminum, whose suggestive central curve represents the union between the past and present.

The exclusive simplicity of its design guarantees a discreet presence. Its precise ergonomics guarantee a comfortable grip, allowing the user to slide the door open with a simple, light movement, at their own rhythm.

Because the beauty is in the details.

Materials and Sensations

The selection of materials is a fundamental part of designing spaces and plays a key role in the final result.

Touch, contrast, sound, transparency — they all come together to customize rooms and generate wellness. Light and movement, in turn, work to reveal a new reality.

Solid aluminum, its smooth finishes, and the sensuality of its discreet curves give **TEMPO** its own personality and elegance. Discretion capable of adapting to any style. Character that can always be recognized: ergonomics wrapped in simple and suggestive beauty. An accessory that makes the difference.

Reconceptualizing problem areas

TO GIVE YOU
THE BEST SOLUTION

Glass can break fairly easily if you try
to screw a handle onto the panel.

TEMPO PREVENTS RISK OF BREAKAGE

KLEIN has designed their new **TEMPO** handle with an adhesive option. Just one more way to support glass professionals, simplifying installation and reducing risk.

PERFECT DETAILS

You will be seduced by its ergonomic design and the thought given to its finish. The adhesive version of the **TEMPO** handle is an integral, beautiful piece, without any holes or visible glue.

NOT CONVINCED?

You may prefer
the screw-on option!

Versatility

The TEMPO handle sticks to glass and gets screwed onto wood, for impeccable finishes.

Another opportunity to customize, based on the importance that you want to give the accessory.

SILVER

MATTE BLACK

DARK BRONZE

Its **three possible finishes** make TEMPO an ideal final detail, regardless of the style of your project.

Choose: you decide.
