13 REGULACIÓN VELOCIDAD DE CIERRE / CLOSE SPEED ADJUSTMENT

The diagram illustrates the process of adjusting the closing speed of sliding doors. It starts with a perspective view of a sliding door system where the bottom rollers are circled in red. This is followed by two detailed cross-sectional views of the roller assembly. The first view, labeled 'Derechas / Right', shows the roller with a '+' sign and an arrow pointing to the right, indicating an increase in closing speed. The second view, labeled 'Izquierdas / Left', shows the roller with a '-' sign and an arrow pointing to the left, indicating a decrease in closing speed. A legend at the bottom left explains the symbols: '+ = Más velocidad de cierre / More closing speed' and '- = Menos velocidad de cierre / Less closing speed'.

14 COLOCACIÓN DEL TOPE SUPERIOR / UPPER STOP MOUNTING

The diagram provides a step-by-step guide for mounting an upper stop. Step 1 shows the stop component being inserted into the top track. Step 2 shows the stop being pushed into the track, with a dimension line indicating a minimum clearance of 3 mm (1/8 inch) between the stop and the track. Step 3 shows a screw being inserted into the stop. Step 4 shows the screw being tightened. Step 5 shows the stop being pushed back into the track. Step 6 shows the stop being pushed back into the track. Step 7 shows the stop being pushed back into the track. Step 8 shows the stop being pushed back into the track.
